Protect your family from 4 dangerous hazards:

Smoke, Fire, Carbon Monoxide and Natural Gas

Smoke & Fire Alarms Save Lives

**Test your smoke alarms regularly
and sleep better at night!**

The New 4-in-1 Safety Sentry™ alarm uses a single sensor to detect both CO and Natural Gas and protects against both fast flaming and slow smoldering fires.

Sleep Apnea Can Rob Years From Your Life

A SLEEP STUDY WILL DETERMINE IF YOU ARE AT RISK.

Undiagnosed and untreated sleep apnea increases the risk of heart attacks and strokes up to 300% and can reduce life expectancy up to 15 years! Cardiac-based sleep studies offered at Arizona Cardiac Sleep Facility (ACSF) are important because of the connection between heart attacks, strokes and sleep apnea.

What You Need To Know

- One in three people over 55 may have sleep apnea.
- 90% of women with apnea are undiagnosed and heart disease is the number one killer of women.
- 87% of Type Two Diabetics have sleep apnea.
- ACSF offers a home-like environment to put you at ease, including in-room TV, movies and free Wi-Fi.

FREE 5-Minute Epworth Sleepiness Screening

Medicare and most
insurance plans accepted.

MOST TRUSTED FAMILY OF WINDOW AND PATIO DOOR BRANDS IN AMERICA

*America's
Choice*
Most trusted, most recognized,
most recommended family
of window and patio
door brands among
homeowners.†

**DON'T SWEAT THROUGH
ANOTHER SUMMER WITH
YOUR INEFFICIENT, UGLY
WINDOWS & DOORS!**

**Our windows are 70%
more energy efficient
than ordinary dual pane
windows!†**

Maxing out your A/C just won't help. If you have outdated, inefficient windows & doors that let in the sun's rays and leak hot air, you'll waste energy and money trying to keep your home comfortable until you replace them. Built for Northern Arizona's climate, Renewal by Andersen windows & doors will make your home more comfortable and beautiful, and will help you save money on your energy bills!

PREVENTION PAYS

★ **Call for an appointment... we**

★ **CHECK CONDENSER COIL:** Clean if necessary. Foreign material on the condenser coil reduces the system's capacity to remove heat from the space. So your air conditioning system must run longer, increasing energy consumption.

★ **CHECK VOLTAGE & AMPERAGE ON MOTORS:** Improper voltage and amperage can reduce significantly the life of the compressor, condenser and blower motors.

★ **CHECK OPERATING PRESSURES FOR PROPER REFRIGERANT CHARGE:** Improper refrigerant charge — too much or too little — could damage the compressor, and could cause high electric bills through a curtailment of system efficiency.

★ **CHECK ALL ELECTRICAL CONNECTIONS:** Resistance caused by loose connections will create excessive heat at that point, causing improper voltage to various components making them either inoperative or causing eventual failure.

LUBRICATE ALL MOVING PARTS WHERE NECESSARY: Poor lubrication causes drag on the motor and drive shaft, thereby requiring more electricity.

CHECK SAFETY CONTROLS WHERE APPLICABLE: Essential for proper protection of the unit.

CHECK THERMOSTAT CALIBRATION: An improperly calibrated thermostat will call for more or less cooling than is desired, costing money and/or comfort.

CHECK STARTING CAPABILITIES: Assures system will start and operate when needed.

CHECK AIR FILTERS: A dirty air filter can substantially reduce the air flow over the evaporator, resulting in inadequate cooling. A dirty filter could cause high energy usage and compressor damage.
